

# Swansea Hackspace

[swansea.hackspace.org.uk](http://swansea.hackspace.org.uk)

**Free open night  
every Monday  
from 7pm**

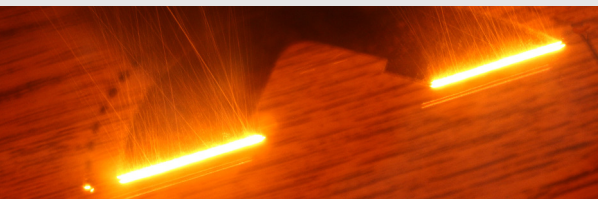

Come along, take a tour of our space, bring your skills, knowledge, and ideas to share with a like minded community.

We run frequent skill sharing workshops and tutorials on a wide range of making, crafting and digital fabrication techniques, check our website for details.

**Make, Share,  
Create, Learn.**

Swansea Hackspace is a community enthusiastic about making, crafting, tinkering and fabricating. All of our activities are run by and for our members on a not-for-profit basis.

We maintain a shared working and meeting space in the city centre which is equipped with a wide range of tools; everything from sewing machines and soldering irons to 3D printers and laser cutters, whatever you need to turn your ideas into reality.
